کارگاه فشرده نرم افزار ریاضی

INTRODUCTION TO SAGE,
A FREE SOFTWARE FOR MATHEMATICS

Thierry Monteil

Thierry Monteil is a French CNRS researcher of mathematics, and a developer of Sage. His research interests range from dynamical systems to discrete geometry, tilings and models of computation

We will introduce Sage, a free open source alternative to Magma, Maple, Mathematica and Matlab, and show some examples from experimental mathematics. Please bring your laptop to practice if you have one and/or an empty 8 GB USB drive if you want to go back home with a Sage live installation.
